PROJECT FLEX

FEEL THE FLEX

PROJECT FLEX is designed for players who want greater feel, control and connection on every shot.

At the heart of the paddle, the innovative DualFusion Frame combines a stable carbon outer frame with a more compliant inner layer, creating a controlled bending profile that flexes predictably while remaining stable through impact.

This engineered flex increases dwell time, allowing the ball to stay on the paddle face a fraction longer for enhanced touch and greater control when shaping shots

PROJECT FLEX

Features

- *DualFusion Frame*: Carbon Outer Tube + Fiberglass Inner Tube
- Raw Carbon Hitting Surface
- EPP Foam Core
- 360° TPE Shell
- USA Pickleball Approved

Benefits

- Carbon outer tube delivers **explosive power**.
- Fiberglass inner tube enhances touch and **shock absorption**.
- EPP Foam Core and 360° TPE shell work alongside the frame to support a **responsive, comfortable and consistent feel**.

PROJECT FLEX

Launch date
1st October 2026

Code	200205
Model	Project Flex 2026
Technology	Dual Fusion Frame, Raw Carbon HS, EPP Foam Core, 360° TPE Shell
Style	Power and Control
Thickness	14 mm
Weight	230 g / 8.1 oz
Length	417 mm / 16 in
SRP	£190.00

HITTING SURFACE MATERIAL

MICRO-FORGED RAW CARBON HITTING SURFACE

The Micro-Forged Raw Carbon hitting surface is a pickleball innovation from HEAD, delivering a distinctive, premium look while enhancing feel and spin. Its micro-forged carbon construction promotes consistent ball interaction for controlled spin and precise feedback, offering durable performance without relying on heavy surface texture. When paired with TriFlex core technology, the construction works together to increase dwell time, improving spin and overall shot confidence.

12K CARBON HITTING SURFACE

The Toray 12K raw carbon surface delivers a perfect blend of stiffness and flexibility, providing enhanced ball feel and control. Its textured finish maximizes spin potential, giving players more accuracy with every shot.

RAW CARBON HITTING SURFACE

With the T700 Toray raw carbon hitting surface "controlled spin" becomes reality. The raw carbon fibers allow the ball to dwell longer on the face of the paddle, resulting in a more controlled and solid shot.

CARBON HITTING SURFACE

A carbon hitting surface offers more control and precision due to the stiffer nature of carbon. Carbon paddles are known for their durability and enhanced ball feedback, making them ideal for players seeking a more controlled, consistent feel.

COMPOSITE HITTING SURFACE

Discover the enhanced playability of HEAD's composite hitting surface, delivering a softer touch and increased power suitable for all players.

HITTING SURFACE TREATMENTS

SPINFUSION

SpinFusion merges T700 Toray Raw Carbon with SpinOn texture for massive spin potential and maximum roughness consistency for every player.

SPIN ON

A specially developed lacquer that is applied to the paddle face creating a higher point of friction resulting in massive spin potential.

SPIN GRID

The SpinGrid Surface delivers unprecedented spin potential. Coupled with an outstanding design Spin Grid paddles are providing slightly more power compared to their Raw Carbon counterparts.

SPIN+

Experience the revolutionary Spin+ technology featuring a precision laser-printed 3D structure. Elevate your game with enhanced spin control and maneuverability.

CORE

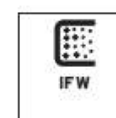

TRIFLEX

Tri Flex is HEAD's three-core pickleball construction, combining EVA foam, EPP foam, and PP honeycomb to fine-tune performance. Each material plays a specific role and is balanced differently across our pickleball silos to emphasize power, precision, or all-court performance, while maintaining a consistent, premium feel.

THERMOTECH

Experience the pinnacle of paddle perfection with our ThermoTech technology, revolutionizing the game by ensuring enhanced consistency, a wider sweet spot, and a supremely stable hitting feel, elevating your pickleball performance to new heights.

INJECTED FOAM WALLS

Injected Foam Walls (IFW) ensure unmatched stability in every shot, while expanding the sweet spot for maximum performance on the pickleball court.

MOLDED CONSTRUCTION

Experience unrivaled durability and consistent performance with our molded pickleball paddles.

FOAMED CORE

Newly engineered foam which is strategically placed within the core to enhance the performance benefit of each of our three paddle silos.

GRIPS & HANDLES

HANDLE STABILIZER TECHNOLOGY

HEAD's Handle Stabilizer Technology (HST) encompasses a specialized 8S-Resin handle reinforcement solution offering superior shock absorption and handle stability.

COMFORT GRIP

Specially formulated PU material has been inlaid into the new Ergo Grip creating a softer feel that dampens vibration for ultimate comfort and playability.

ERGO GRIP

Unlock unparalleled comfort and superior feel with HEAD's exclusive ergonomic foam handle.

SOFT BUTT CAP

The new soft butt cap features a dual-component soft material construction, delivering enhanced comfort and a cushioned grip. Designed to reduce vibrations, it helps prevent injuries and blisters.

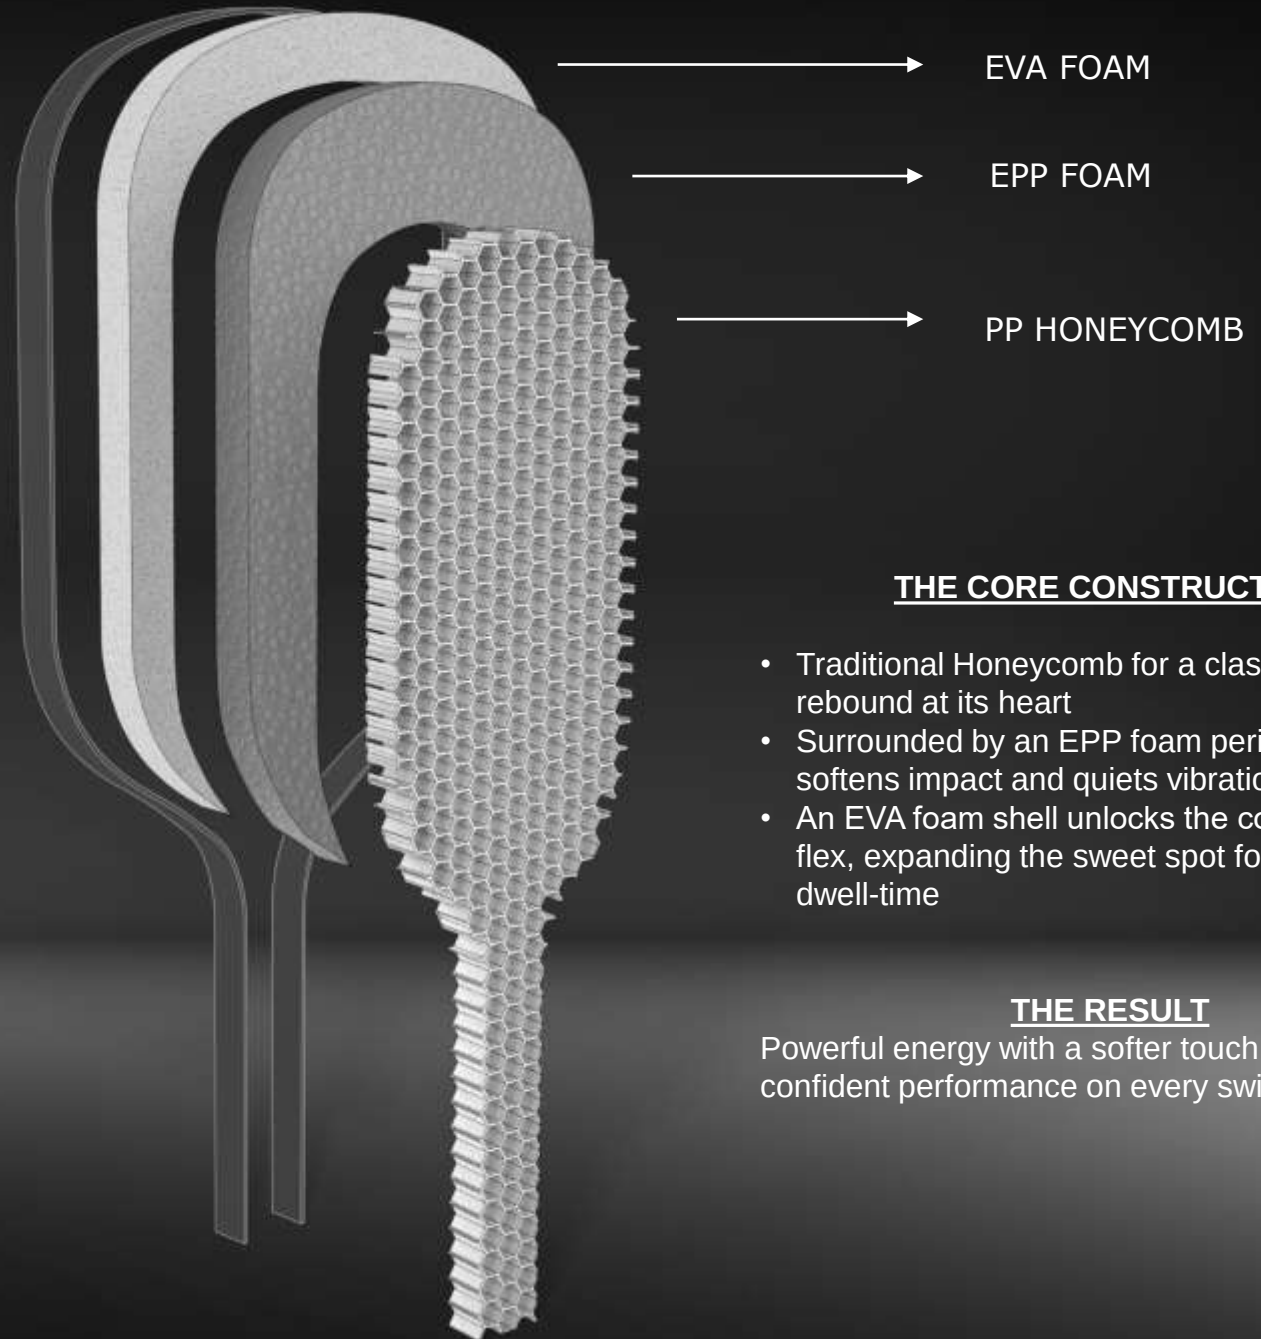

TRIFLEX

R A D I C A L

HEAD[®]

TRI FLEX
VERSATILITY

THE CORE CONSTRUCTION

- Traditional Honeycomb for a classic, powerful rebound at its heart
- Surrounded by an EPP foam perimeter that softens impact and quiets vibration
- An EVA foam shell unlocks the core's natural flex, expanding the sweet spot for increased dwell-time

THE RESULT

Powerful energy with a softer touch — controlled, confident performance on every swing.

BALLS, BAGS & ACCESSORIES

HEAD TOUR 40

- One-Piece Construction
- Rotational Moulded
- No seam
- 40 holes
- Outdoor / Hardcourt Balls
- Slightly thinner wall
- Slightly less weight
- Increased material stiffness
- For all skill levels but particularly tournament play.

Benefits:

- More speed
- Flatter Bounce
- No Seam breakages

HEAD FOAM PRO PICKLEBALL

The HEAD FOAM PRO redefines quiet performance in pickleball. Built with a foam composition matching the diameter and weight of a regular pickleball, it delivers a realistic playing experience with a slightly livelier bounce.

Designed to replicate the feel and flight of standard pickleballs, it drastically reduces noise and minimizes impact-related injuries. Ideal for noise-sensitive areas, indoor facilities, and youth programs, the HEAD FOAM PRO lets players enjoy authentic gameplay without disturbing the surroundings.

Experience full control, comfort, and silence—pickleball, reimagined for every environment.

PICKLEBALL PADDLE ERASER

The HEAD Pickleball Paddle Eraser is your go-to tool for keeping your paddle surface clean and dust-free, ensuring optimal performance on the court.

It's easy to clean the playing surface of your paddle – ensuring optimal performance for your next match – with the Pickleball Paddle Eraser. Each pack contains two erasers in black which will help remove the dirt from the court, along with marks from the ball.

- Specially made for cleaning the playing surface of a pickleball paddle
- Helps remove the dirt from the court and the marks from the ball
- Easy to use
- Ensures optimal playing performance
- Two pack of erasers in one box
- Black colourway

FOOTWEAR & SPORTSWEAR

MOTION PRO BOA PICKLEBALL

- The first HEAD shoe designed purely for picklers and how they move.
- Developed with picklers in the United States
- BOA® PerformFit™ Wrap and Dual Li2 dials deliver micro-adjustable precision fit
- Side panels add more stability than other lacing methods
- Extra tread around the outsole and a hard-wearing rubber toecap
- Breathable mesh and midfoot cooling system
- Full elastic sock construction
- OrthoLite cushioned insole
- Midsole contains DynaFoam, created with small air cells, which is lightweight and highly responsive
- TPU midfoot shank, reinforced upper and Lateral Control+ technology for stability
- Premium design with pickleball details
